The key-elements to consider, when deciding on an environmental mat, are the following: - The absorption capacity of the mat (or ground protecting device) so that no puddles are formed on top. - Under no circumstances must it allow vehicle fluids to seep through onto the soil, thus having to consist of an impermeable (liquid proof) base.
5. Under no circumstances may these mats be disposed of in a standard refuse bin. A hazardous waste container must be available at a designated point within the DSP (Designated Service Point). Any damaged mats MUST be disposed of in this container. Alternatively, the soiled mats can be placed in a sealed plastic container for disposal by a hazardous waste disposal company.
