

## AMTEC 102 OCTANE CONTROL FUEL.

As per the the 2023 Standing Supplementary Regulations for Rally, a control fuel has been introduced for NRC1. See Para 910.

- 1) The only supplier will be Amtec Lubricants in Meyerton.
- 2) The ordering and payment for fuel will be directly between the teams and Amtec, or their approved suppliers. The approved suppliers will be listed in the Supplementary Regulations.
- 3) The fuel will be supplied in 210 litre sealed steel drums, *or 20 litre sealed cans. The drums or cans to be transported to events sealed as received. Drum serial numbers to be listed by the TC's at scrutineering.*
- 4) The drums have fuel batch test certificates linked to the drum serial number confirming the fuel specification
- 5) The drums will have individual serial numbers for batch identification.
- 6) The teams are responsible for the delivery of their fuel to the event.
- 7) Fuel samples may be taken at events by the Technical Consultant/Scrutineer for comparison to the fuel as supplied by Amtec.
- 8) Empty drums are to be removed by the teams from the Service Park at the end of each day.
