12. ENVIRONMENTAL

Refer to Standing Supplementary Regulations as shown below, as well as the MSA Environmental Code:

1. Environmental mats must be composed of an absorbent upper part (top) and an impermeable part underside (bottom). Use of mats (or other effective ground protecting devices/systems) is compulsory wherever work on vehicles (motorcycles, quads, cars, karts, etc) is allowed by the organisers.
2. For Cars, Karts and Quads the whole area underneath the vehicle, where there is the prime probability of fluid spills, must be covered with a ground protecting sheet or environmental mat.
3. In combination with the Environmental Mats or ground sheets, other ground protecting systems like fluid absorbent material, oil spill kits, etc. can be used to clear spillages. These materials must be disposed of in a hazardous waste container.
4. The key-elements to consider, when deciding on an environmental mat, are the following: - The absorption capacity of the mat (or ground protecting device) so that no puddles are formed on top. - Under no circumstances must it allow vehicle fluids to seep through onto the soil, thus having to consist of an impermeable (liquid proof) base.
5. Under no circumstances may these mats be disposed of in a standard refuse bin. A hazardous waste container must be available at a designated point within the DSP (Designated Service Point). Any damaged mats MUST be disposed off in this container. Alternatively, the soiled mats can be placed in a sealed plastic container for disposal by a hazardous waste disposal company.

2. Description of Board and Availability

The board will be made of white plastic 3mm thick, 415mm in length and 360mm in width. On one side there will be a red cross and on the other side a letter "O" or "OK" in reflective green. These boards are available from Rally Head Quarters. No other boards, unless identical to boards available from Rally Head Quarters, will be acceptable.

3. Carrying of Boards in Rally Cars

Boards must be properly secured to the inside passenger compartment or be secured together with the warning triangle to avoid loss, damage or injury in the event of an accident. They must be easily accessible to the driver and/or co-driver as they vacate their seats in the event of an accident. The position and securing of the board will be checked by Scrutineers prior to the start of the event and no rally car will be allowed to start an event without the board being carried and secured in the competing vehicle in an approved manner.

4. Use of board following an Accident

Should any competitor stop due to an accident whilst on the route being used for the event, the board together with a

warning triangle must be displayed. Should medical assistance be required the board must be displayed in such a manner that the red cross is clearly visible to all approaching competitors, preferably at eye level. Care must be exercised to ensure that the correct side of the board is displayed to oncoming competitors. While the board is displayed in this manner the first competitor arriving on the scene shall stop and render assistance.
